[Summary] English: A1-A2 + Russian: Native + Armenian: Beginner ⇒ Ready for relocation: No

I am skilled front-end developer with extensive expertise in web development (7+ years) from Armenia.

I am proficient in creating layouts using various methodologies.

My main areas of focus include legacy code refactoring and web tooling. Also I can quickly adapt to any other tech stack with ease.

My primary technologies are React, Vue, and Angular.

[Experience]

Middle/Senior front-end developer

KonigLabs (web development)

2022 March - Present (Kaliningrad, Russia)

Developed a module for issuing microloans from scratch within an internet banking application, including changes to business logic and UX.

Implemented the Future Slice (FSD) approach to refactoring legacy code in the project, avoiding the need to rewrite the application from scratch.

Middle full-stack developer

Ottofeller (web development)

2021 Jan. - 2022 March

Contributed to the development of a streaming platform (reach.live).

Middle front-end developer

Mass Project (web development)

2019 Oct. - 2021 Jan.

Implemented the FSD approach in application design and integrated unit testing.

Junior/Middle front-end developer

DevHouse (web development)

2017 Nov. - 2019 Oct.

Developed an Angular-based cake builder module for a private SaaS platform serving a bakery network in Norway (cakeiteasy.no).

Junior/Middle full-stack developer

Abtronics (digital commerce)

2017 Jan. - 2017 Nov.

Rewrote the interface of the company's internal CRM using PHP, JavaScript, HTML, and CSS.

System/Network administrator

Citilink (digital discounter)

2013 Jan. - 2016 Mar.

Performed tasks related to the maintenance of equipment like cash desks, terminals, CCTV, etc.
